

Reinforcing mesh seat with spy

For use in attaching reinforcing mesh to PE foam. The seat ensures 25 mm of concrete cover between the mesh and PE foam. The seat has an indicator for 70 or 75 mm, to ensure the correct thickness of sprayed concrete. The seat should be mounted in the crossing of the reinforcement mesh to ensure that the mesh is adequately mounted.

Stock programme:

Reinforcing mesh seat 70/25 w/spy black
Reinforcing mesh seat 70/25 w/spy yellow
Reinforcing mesh seat 75/25 w/spy red
