

## Spacer for bolt M16-M20

Spacer ring for bolts in dimension M16-M20. Spacer is mounted onto bolt after the front plate has been installed. The spacer is followed by the reinforcing mesh and reinforcement fitting and provides a 25 mm distance between the PE foam / membrane and the reinforcing mesh.

Different solutions for water and frost prevention in tunnels are found in report 510 and V520 from Statens Vegvesen (Norwegian Road authority)
