

PE Foam gasket

Round PE foam gasket for use between steel plate and membrane in tunnels. Gasket is a vital component for watertight bolting connections. Norwegian road authorities (Statens Vegvesen) report 510, *Gode løsninger for vann- og frostsikring i tunneler*, gives guidance for different solutions for water proof bolt connections. The book also has assembly drawings showing of mounted rubber gasket together with bolts and sleeves.

Stock programme:

Ø150x5 -Ø12 M16/M24

Technical information:

Crosslinked Polyethylene foam

Expected lifetime for use in tunnels 120 years. Tested by 3rd party test facility (SP)

Accessories:

Bolt M24, back plate w/sleeve, membrane, sealing washer and nut
