

Pretec Packer – Flergångs

Injection packer for multiple use. Used for sealing of drill holes close “stuff”, for building pits and similar. To be used together with Pretec grouting tool.

Stock program:

Dimension / Type	For drill hole (mm)	Recommended hole diameter (mm)	Max recommended injection pressure (bar)	Torque* (Nm)	Rubber length (mm)	Color code
PMU 45	45	44-47	60-70	100-120	140	Red
PMU 48	48	47-50	60-70	100-120	140	White
PMU 51	51	50-53	60-70	100-120	140	Pink
PMU 54	54	53-56	60-70	100-120	140	Yellow
PMU 57	57	56-59	60-70	100-120	140	Blue
PMU 60	60	58-62	60-70	100-120	140	Orange
PMU 63	63	61-65	60-70	100-120	140	Green

*Should not be less than

(PMU = Packer Multiple Use)

Technical information:

Compressible mechanical packer. Rubber tube expands when steel washers are pressed against each other. Do not expose to direct sun light or temperature above 50°C.

Safety warning:

Do not stand in front of or next to drill hole or grouting tool when injection is taking place!

Prior to removal of grouting tool, the rock needs to “sit” for a period. Of time. Make sure that the injection pressure is low enough before disassembling the grouting tool.

See user guide for correct use of packer and grouting tool.

Accessories:

Pretec grouting tool.
