

Half ball compact acid resistant with rubber coating

Half ball for use with Ø150 or Ø190 spherical bearing plate to achieve a good transfer of forces with angular deviation of the bearing plate in relation to the bolt. This prevent bending stress on the bolt. The rubber coating aids waterproofing from both sides of the PE foam.

Stock programme:

Half ball M20 / Ø22-50 compact 1.4404 w/rubber coating Half ball M20 / Ø22-50 compact 1.4462 w/rubber coating Half ball M24 / Ø26-50 compact 1.4462 w/rubber coating Half ball M33 / Ø35-65 compact 1.4462 w/rubber coating Half ball M36 / Ø38-65 compact 1.4462 w/rubber coating

Other sizes on request.

Technical information:

Half ball: Material stainless steel(AISI 316L) 1.4404 with option stainless steel (DUPLEX) 1.4462.

Rubber: EPDM 60 Shore A (60° IRHD ±5°)

Weight: 0.18 kg/pcs.

Accessories:

- -Threaded rod,
- -joint sleeve,
- -bearing plate and nuts,

all produced in material stainless steel(AISI 316L) 1.4404 with option stainless steel (DUPLEX) 1.4462.
