

Sealing plug

Sealing plug to ensure watertight bolt insertion through back plates. The sealing plug is pre-mounted on the back plate. In order for the sealing plug to function as intended, it is important that the plug is not pulled back and forth on the bolt. If the sealing plug is damaged it can be easily replaced with a new one.

Stock programme:

M16 – M20 – M24 – M30 – M33

Technical information:

Material: EPDM

Shore: 60° Shore IRHD +/- 5°

Colour: Grey

Tolerance: ISO 3302

Finish: SIS 162950 Class M3

Ref. drawings: PTC-115-1, -2, -3, -4, -5

Accessories:

Back plate
